

OPEN POSITIONS

- RESEARCHER-BIOMATERIALS & TISSUE ENGINEERING
- RESEARCHER-FLEXIBLE ELECTRONICS & MICROFLUIDICS
- RESEARCHER-MICROFLUIDICS & ORGANS ON A CHIP
 - RESEARCHER-CANCER AND IMMUNOTHERAPY
 - SCIENTIST-CHEMISTRY
 - FACULTY/INVESTIGATOR

OUR VISION

The Terasaki Institute for Biomedical Innovation envisions a world where personalized medicine is available to all.

Every person is unique with individual challenges to optimal health, from genetic predisposition to disease to socioeconomic barriers to care.

We strive to address those challenges to bridge the gap between sickness and wellness.

The Terasaki Institute for Biomedical Innovation aims to tackle the biggest problems in health.

We are focused on solving problems in new ways, developing 'personalized' solutions, prototyping tangible solutions, and bringing our innovation to the real-world.

WHERE WE DO IT

Southern California

- Westwood WW building, 19,000 square feet, location is where data scientists, statistical and clinical scientists, and admin staff are located.
- West Los Angeles WLA building, 18,000 square feet, location is the main lab for research and development.
- Woodland Hill WH building, 50,000 square feet, location is currently being renovated and will be the new home to our state of the art biomedical research labs. (Opening 2022)
